

*Tap into the quick, easy way
to remove paint roller covers.*

patent pending

**KWIK
CHANGE™**

***Introducing the KWIK-CHANGE™ Roller Frame
Exclusively from Rubberset.®***

Quick and easy removal of paint roller covers is just a tap away with the new, patent pending, KWIK-CHANGE™ Roller Frame available exclusively from Rubberset.®

When your paint job is done, just firmly tap the shank for an easy KWIK-CHANGE™. The exclusive bearing design locks onto the cover so it will not "walk off" in use. Unlike lesser designs, the KWIK-CHANGE™ bearings will not clog with paint for a fast and easy clean-up.

Built-in durability allows this frame to withstand the rigors of the most demanding professionals. KWIK-CHANGE™ frames feature a chromed steel rod and Teflon™ bearing sleeves for effortless rolling that eliminates gray streaking.

In addition, our newly designed, textured grip provides improved productivity and comfort.

The KWIK-CHANGE™ is also a time-saving alternative for D-I-Y'ers that want to complete their project without the messy clean-up.

So tap into the KWIK-est way to clean up, the KWIK-CHANGE™ Roller Frame, available exclusively from Rubberset.®. Your source for quality painting applicators since 1873.
