

ULTRA FINISH

Brushes & Rollers

For the ultimate paint job, the Ultra Finish™ line of brushes and roller covers provides the smoothest, finest painted finishes. This line of brushes & rollers is especially suited for use with coatings like semi-gloss and gloss enamels that demand high performance applicators to deliver premium results.

Ultra Finish™ brushes feature a custom blend of nylon & polyester filaments. The filaments are ground to a sharp point to offer the sharpest cut-in. Therefore, Ultra Finish™ brushes are particularly suited for painting areas that demand a precision tool. The high concentration of nylon tips, combined with the sturdy polyester filaments, creates a soft flex designed for latex and oil coatings on all surfaces and in all environments. Ultra Finish™ brushes have hardwood maple handles, corrosion resistant ferrules and hand trimmed filaments.

Ultra Finish™ rollers feature a custom blend of nylon and polyester fibers that offer a traditional paint release. This blend provides a longer lasting cover as compared to a 100% polyester blend and performs very well on rough surfaces. The fabric is epoxy bonded onto a heavy wall, solvent resistant core.

- Tipped finish for the sharpest cut line
- Finest dyed solid tapered nylon and polyester
- No rust hybrid metal ferrule
- Hardwood Maple handle
- Hand trimmed tipped filaments

Brushes
