

THE WAVE™

PATENT PENDING

Brush Technology Breakthrough

by  Rubberset®

The latest "wrinkle" in brush technology.

The addition of WAVE™ filaments to professional brushes has revolutionized the painting industry by creating a tool that picks up and releases more paint per dip for increased production. Rubberset® has created a tool that actually paints faster and further than any other brush on the market. When time is money, it pays to put THE WAVE™ to work.

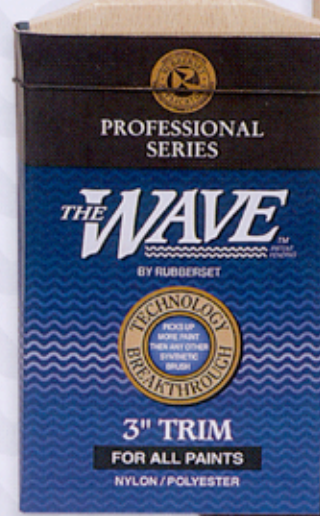

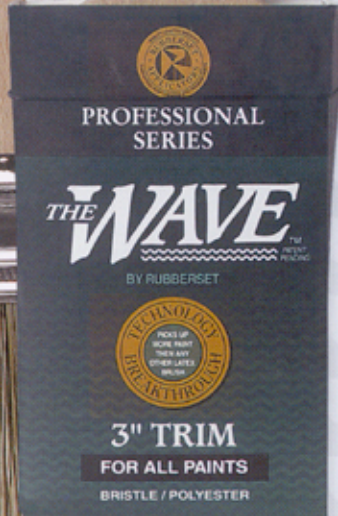

The White China Bristle/WAVE™ polyester blend offers the *ultimate in*

productivity picking up over 50% more paint per dip than other synthetic brushes. Coupled with this exclusive filament blend are stainless steel ferrules and sealed hardwood

Beech handles for the ultimate in durability and cleanup. Each brush is carefully handcrafted and trimmed to create the most productive paint brush ever invented.

The Nylon/WAVE™ polyester blend is especially suited for painting intricate areas or cutting in. The durable, dyed nylon filaments which are precisely finished and hand trimmed deliver a sharp cut-line and excellent flow and leveling. This exclusive design picks up 25%

more paint than any other synthetic brush and provides a long-life tool that delivers *precision trimming with high productivity.* The WAVE™ Nylon/Polyester brushes have sealed hardwood Beech handles and stainless steel ferrules.

THE WAVE™ White China Bristle/Polyester

UPC	Item #	Size	Description	Thickness	Length Out	Pack
